

Transitioning from a mere student to a successful law graduate at TMV has been a vision to reality. It has only been possible with the aid of the faculty members and my peers. Throughout my 5 years of law at this university, I had the privileged opportunity to develop analytical skills and leadership qualities through various programs conducted at the campus. Mentors and professors actively help students to enhance their academic and interpersonal skills by not only delivering classroom teaching but with hands on real world examples.

Guidance and personal attention at every stage of preparation for National and State level Moot Court Competitions have helped me achieve unexplainable poise and firmness for the external world. Also, with a lot of international students onboard, the college gracefully helped them blend in and understand our culture of education. To sum it all, from helping me lead with a lifelong career excellence to an outstanding pedagogy, my education at Lokmanya Tilak Law College was an experience I shall cherish forever.
