

## **Departmental Activities Conducted By Institute Of Nursing Education and Research**

As per the W.H.O.report in most countries of the world there is a shortage of nurses and it is so acute as in the developing World. India faces an acute shortage of nursing staff with an estimated deficit of 2 million and in the public sector alone, an additional 140,000 staff nurses are required. Considering the need of the hour to render promotive, preventive, curative and rehabilitative services to the society, training was essential to create nurse professionals.

### **Social Impact (Awareness among Community & Society):-**

For the social awareness among society, we organize various health awareness programmes as per the need of rural and urban community, conducting activities on World Health Days and participate in national health programmes by Governmental and nongovernmental organizations. We conduct health check up camps, exhibitions, street plays , role plays, puppet show & health education programmes. We have undertaken various KAP studies (Studies on knowledge, attitude and practices) research projects which are beneficial to the society to create awareness, improving their knowledge, attitude, behavior and practices to improve their health status and achieve the goal of Primary Health Care.

- Participation in governmental National control programmes e.g. pulse polio programme, family health survey, non-communicable disease surveys.
- Blood donation camp
- Health check up camps- Anganwadi, school,
